A bright future is rootEd in a strong education.

The Challenge to Address

At a time when 80 percent of jobs that pay middle class wages require more than a high school diploma, postsecondary education has never been a greater differentiator in a student’s future success and livelihood. This reality has profound implications for rural communities and small towns, where less than 30 percent of adults hold a bachelor’s or associate’s degree. Changing these odds for rural students isn’t just a moral imperative, it’s an economic necessity.

What is rootEd Alliance?

Launched in 2018, rootEd Alliance™ is a new collaborative philanthropic effort to prepare students in rural America for stronger futures by providing them with advice, exposure and access to college and career opportunities. To accomplish its purpose, rootEd Alliance partners with organizations actively working to improve postsecondary access and completion among rural high school and college students. With strategic guidance and oversight, rootEd Alliance links these organizations to create a holistic model that supports students starting in high school through college graduation. Together, they clear the path for rural students to pursue their dreams.
32% of high school students
live in rural communities and small towns

LESS THAN 5%
of U.S. foundations’ annual giving
goes to rural areas

rootEd Alliance Model

**Provide early exposure to what’s possible**

- Place dedicated college and career advisors in rural high schools to serve the full student body
- Provide advice and support through postsecondary completion

**Implement shared goals and metrics across partners**

- Provide early exposure to education pathways and careers
- Strengthen connections between education and local industry
- Facilitate internships for college students

**Build a college-going culture**

- Connect students to available sources of financial aid
- Build financial literacy
- Award last-dollar scholarships for undergraduate and transfer students

**Create pathways to stronger economic futures**

**Improving outcomes for rural students**

- Postsecondary enrollment
- Postsecondary completion
- Future economic mobility

- 9 percentage point increase in postsecondary enrollment
- One Alliance of support, shared learnings & resources

Missouri
Cape Girardeau (Cape Girardeau County), Lebanon (Laclede County), Marshfield (Webster County), Poplar Bluff (Butler County), Warrenton (Warren County), Union (Franklin County)

Tennessee
Lawrenceburg, Loretto, Summertown (Lawrence County)

5 Students from high schools in the extended rootEd Alliance network are eligible to apply for scholarship opportunities and receive the support of a rootEd advisor if they attend a participating community college.
rootEd Alliance is made possible by a group of family business owners and individuals, including the Trott Family Foundation, Steward Family Foundation, Emily Rauh Pulitzer, Barbara and Andy Taylor and the William T. Kemper Foundation, among others. This collaborative effort was borne out of BDT & Company's commitment to building impactful social projects that bring donors together around big ideas that are underresourced and overlooked by the philanthropic sector, with great need and great potential for impact.
